

# WHERE AM I?

In WhereAmI?, you need to find the correct **location** of a mystery item. Hover over dots in the plot to inspect them to get an idea of which items are at a location.

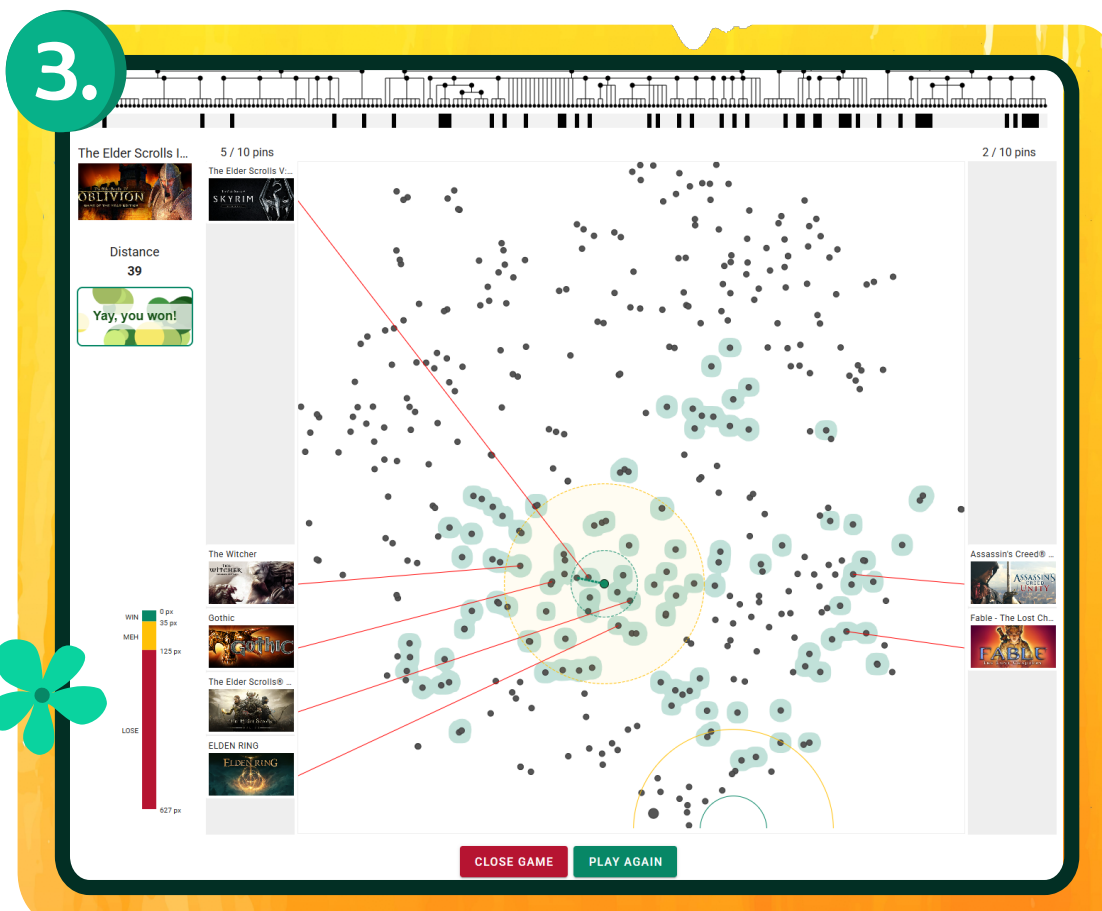

Place your guess to see how close you are! You can pin items you find relevant with a right click and the plot's background color indicates which items you already looked at.

exclude items until you are satisfied

explore the plot, pin relevant items, and place your guess

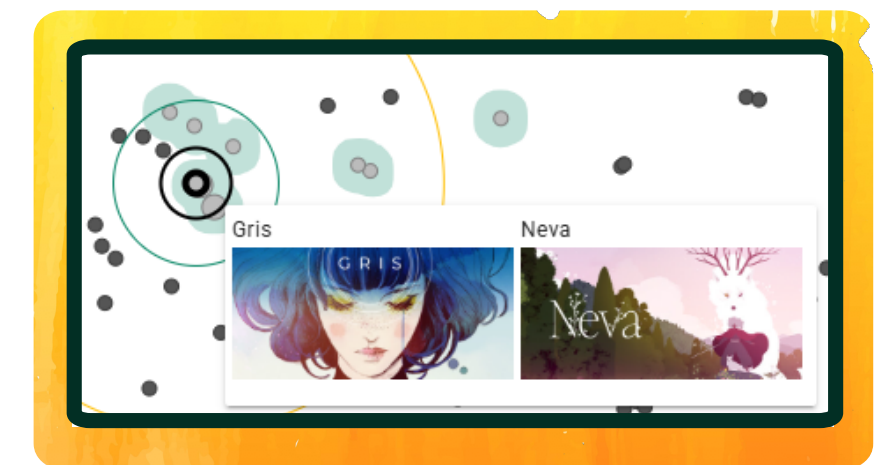

submit your guess and see how close you are

## INSPECT ITEMS

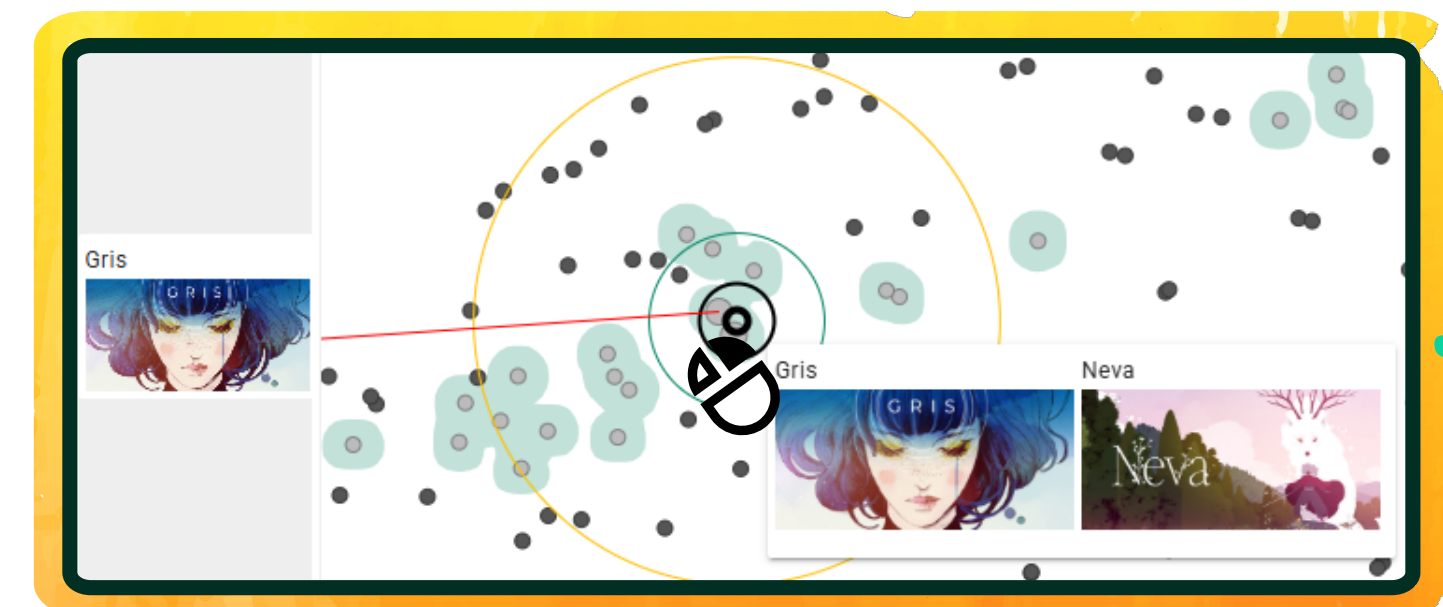

To inspect an item, simply hover over it with your cursor - sorry mobile users :(

This will show you the item's name and its teaser in a tooltip. The dots in the plot will also appear bigger and visited items have a grey fill color.

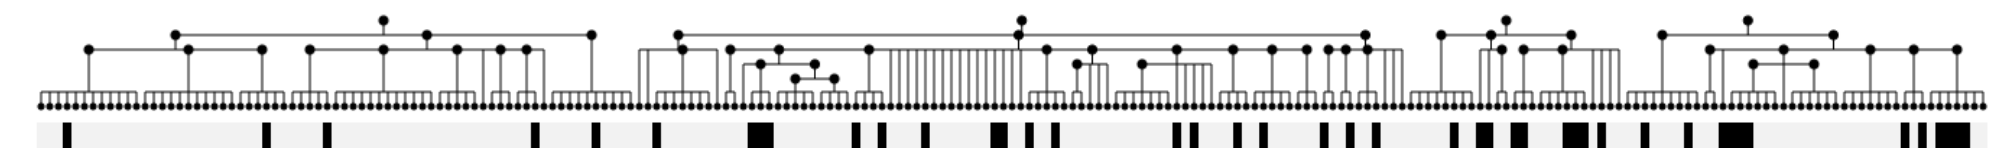

## PIN ITEMS

You can pin items on each side of the plot. Simply right click an item to pin or unpin it. In case there are multiple items under your cursor, only the first item will be pinned.

## ANALYZE RESULTS

After you submitted your guess, the solution will be revealed. You can browse all tags of the mystery item by hovering over its bar code.

To object to a tag assignment of the item you can open the context menu by right-clicking the bar code and clicking on the **! add objection** option.

You can open the item editor by clicking on an item teaser.
